Since its launch in 2011, the Faculty of Arts & Design, MSA University has acknowledged the necessity and importance of extracurricular activities understanding the deep impact and broad reflection it has upon students during their course of study in the Faculty as well as in their future careers after graduation.

The Faculty of Arts and Design established an activities program directly related to each department in the Faculty consisting of 3 major parts; workshops, field trips and guest speakers. This program is crucial for the development of the student both on the intellectual and practical level allowing further understanding and practice in the field of specification.

Field Trip

Aims:

- Understand the package development and making processes.
- To be familiar with packaging printing process and packaging implementation.
- Gain practical knowledge about packaging materials and different types of papers.
- To be proficiency in finalizing the design for printing.
- Investigate the packaging design, printing and finishing problems.

Trip in details:

Field Trip

Aims:

Field Trip reflection to the learning outcome:

The effects of this field trip to students meet the following ILOs:

1- Demonstrate an awareness of the development of packaging and key packaging materials.
2- Understand the package development process and evaluate contemporary packaging.
3- Analyse package development process, select techniques and processes to take the packaging design to realization.
Trip in details:

About 17 students and 4 faculty members moved from MSA Tuesday 26th April 2016, we arrived the printing house after 1.30 hours. The printing house includes different sections which are printing area, die cut area, rigging and finalizing area. The printing house owner was our guide, he accompanied us throughout all sections, we began in printing area where students saw the different types of papers, the preparation for printing process including color separation, CTPs, and inks, then asked a lot of questions that be answered from the technicians and Dr. Huda.

We went to the die cut area, students saw how the designers prepare die cut tracing using Adobe Illustrator, this process already explained in details in the lectures they have a good idea about it, we saw the machine that making die cut knifes by explains most of die cut probable problems, students asked a lot of questions that be answered from the technicians and Dr. Huda.

Finally we went to the rigging and finalizing area, the technicians explained in details the different stages of packaging finalizing and the probable problems.
Students said "It's really different to see the packaging industry and how to apply the die cut system, it will help us a lot to more understanding in die cut stages, more understanding in offset printing, and finalizing techniques"
Students said “It's really different to see the packaging industry and how to apply the die cut system, it will help us a lot to more understanding in die cut stages, more understanding in offset printing, and finalizing techniques.”
Field Trip

Number of Students: 100
Level: 2

Related Units:
INTR282 (Studio II), INTR241 (Building Construction & Material).

Relation to the Unit/Units: Students are obliged to attend this field trip. An assignment will be given and it will be part of the mid-term exam presentation. In case any student cannot attend the field trip with an accepted reason another assignment will be given to him/her.

Supervision: Dr. Doaa A. S. Abouelmagd, L.A Heba Eissa
TAs: Laila Gamil, Rasha Elshaity, Sara Sabahy, Nada Erisha, Nariman Samy

Duration & Date: 5 Hours, Friday 18th of March 2016
Destination & Address: Fatimia Historical Cairo - The main entrance of Bab elfotouh.
- Fatimia Historical Cairo
- The main entrance of Bab elfotouh.

5 Hours
Friday 18th of Mars 2016

- Number of Students: 100
- Level: 2

Supervision: Dr. Doaa A. S. Abouelmagd, L.A Heba Eissa
TAs: Laila Gamil, Rasha Elshaity, Sara Sabahy, Nada Erisha, Nariman Samy

INTR282 (Studio II), INTR241 (Building Construction & Material).

Relation to the Unit/Units: Students are obliged to attend this field trip. An assignment will be given and it will be part of the mid-term exam presentation. In case any student cannot attend the field trip with an accepted reason another assignment will be given to him/her.
Throughout the accumulative, progressive lectures of the course, they will be prepared to make an analysis of one of the historical buildings visited during the fieldtrip in Cairo.

After the visit they will be able to develop their visual skills and analysis, also learn to appreciate basic Architectural principles, such as order, proportion, balance, unity, etc. Aspects that result from form generation such as enclosure, openness and continuity are also discussed.

The field trip is necessary to develop the student analytical and visual skills and introduce them to real and historical examples. The field trip assignment is an application for the theoretical course materials.

- Differentiate, observe and Analyze related visual information.

The trip will take place on Friday March 18th (For all groups), this trip will compensate the classes of Tuesday 15, March 15, 2016.

Trip route:
Bab Elnasr, Bab Elfotouh, Fatimid walls and El-Moez St., El- Hakeem mosque and El- Akmar Mosque, Qalawun Complex, Beit El-Sehimy,
Amir Beshtaq palace and Sabil Abdelrahman Qatkhuda, and finally wekalet Bazaraa (see the following map).

Each group has to complete the assignment by using references, architectural drawings, and make a research to answer the following questions:

- Give a brief historical explanation about your site/building.
- What are the physical and functional components of your example?
- Analyze and give examples for the vertical and horizontal circulation systems in your building/site (analyze the entrance, the movement, staircases and other vertical circulation systems if applicable).
- Give examples for the primary elements in the architectural space (Point, Line, Volume and Plane).
- How can you define ‘the shape’ of the architecture in your site?
- Find examples for regular and/or irregular forms and shapes in your site.
- How can a form be transformed? Find examples for transformed forms, if applicable.
- How can you define the spaces in your site?
- Find examples for openings and views through these openings.
- Find examples for the light and shadow? Find examples for the relationship between the light and shadow.

Trip Route:

The trip will take place on Friday March 18th (For all groups), this trip will compensate the classes of Tuesday 15, March 15, 2016.
Shadow? Find examples for the relationship between the light and shadow and the (North, South, East, West) directions.

- Find examples of how can the light reveals the shape, color and form.
- How can openings help in providing different views?
- Find examples for interlocking spatial relationships if applicable.
- Define the spatial relationships in your building or site.
- Define the spatial organizations in your building or site.
- Explain the relationship between the human scale and the scale of the indoor and outdoor space in your building or site.
- How can the Islamic architecture inspire you in your study?

Group work:

1- You are required with your group (the same field trip group) to answer all the questions of the fieldtrip assignment and prepare a 15 min PowerPoint presentation of your analysis. You have to present several examples for each question and analyze them using computer software (for example Photoshop).

2- Beside the PowerPoint presentation each group is required to prepare a poster to present their analysis and work. The Poster is 120 cm * 80cm and (landscape view). Any other dimensions or view will not be accepted. (Submission of the poster in hardcopy and softcopy).
3- cm * 80cm and (landscape view). Any other dimensions or view will not be accepted. (Submission of the poster in hardcopy and softcopy).

4- A CD for the photos that record the fieldtrip.

Creativity and analysis 20%
Clarity and presentation (Group) 20%
Clarity and presentation (personal) 20%
Requirements 40%

154661: It was very organized Should have been during the normal week days.
154177: It was very interesting experience for me and I would love to repeat it again.
153873: It was very nice day and we have learnt more information but we need to have more trips like this day to collect more information and have more experience.
152955: It was good but we wanted to be provided with buses to take us to and from the place.
For Full feedback (Please check the attached sheets).
Field Trip 2

Destination & Address:
SODIC real estate development company.
Cairo-Alexandria Desert Road Sales Centre
Km 38 Cairo-Alexandria Desert Road Sheikh Zayed City, Giza, Egypt.

Field Trip Duration & Date:
4 Hours from 10 am to 2 pm
Thursday 31th of Mars 2016

Number of Students & Level:
- Number of Students: 46
- Level: 2

Supervision:
Prof. Dr. Aleya Abdelhady
Dr. Rasha El-zeiny
TA/ Yomna Hamdy
TA/ Nada Arisha

Related Unit or Units:
Interior Design Studio Two (IN-TR282)
To help students to see more about Real estate development and get exposed to professional communities.

- Provide an inquiry field experience for students so that they can explore the new and different forms of residential spaces.
- Enable the students to visualize and comprehend what they have learnt in the classroom.
- Update students with some of the new residential projects in Egypt.

- Acquire useful application of the “inquiry based learning approach” where data and information are converted into useful knowledge and applications in the design process.
- Develop analytical and critical capabilities
- Identify and learn the use of materials, fabrics, color, lighting, other elements and subjects involved in designing and furnishing the space
- Possess and practice necessary skills and traits for successful interaction with interior design professionals in their future career environment.
- Integrate various design project elements to conclude and assess design related tasks simulating professional practice environment.
- Students arrived at SODIC (11:00 am).

- Introduction by the sales manager to SODIC’s Developments by seeing the mass plan model (maquette) of the project and took photos (11:00 am - 11:00 am).

- Heading to WESTOWN RESIDENTIAL NEIGHBOURHOOD, They visited two different apartments with two different styles (Islamic and natural zen) and know the difference between both of them (11:30 am - 12:30 pm).

- Heading to FORTYWEST VIP RESIDENTIAL NEIGHBOURHOOD and visiting two different duplexes (warm and cold) colors, materials and furnishing. (12:30 pm - 1:30 pm).

- Students arrived at MSA University Campus (2:00 pm)

It was very nice day and we have learnt more information but we need to have more trips like this day to collect more information and have more experience.
Students arrived at SODIC (11:00 am).

Field Trip 3

**Destination & Address:**
Bayt Al Memar.
Address: Behind Al Sultan Hassan Mosque- Old Cairo.

**Field trip Duration & Date:**
6 Hours 🕒 from 9 am to 3 pm
Tuesday 10th of May 2016

**Number of Students & Level:**
- Number of Students: 67
- Level: 3

**Supervision:**
L.A: Karam Abdullah.
T.A: Nada Arisha
T.A: Israa Alaa

**Related Unit or Units:**
INTR361 - Contemporary Design in housing and Interiors.
Relation to the Unit/Units:
INTR382 - Studio 4.
Relation to The course:

It helps the students to know about Bayt Al Memar as an Islamic House related to the Ottoman era, and how it was opened later on by the Architect “Essam Safi El Deen” as a museum in 2014.

Field Trip Aims:

To recognize the different Egyptian styles such as Ancient Egyptians- Nubian-Coptic Styles - Islamic Architecture in Paintings, Photographs and 3d Models, Also it shows contemporary architects who lived in Bayt Al Memar such as (Hassan Fathy- Ramses Wesa Wassef).

Make the students able to know about the architects Hassan Fathy and Ramses Wesa Wassef as Egyptian Contemporary architects, also to know their different works in Interior design and architecture.

Trip in details:

- Meeting point is in the University at 8:30 am.
- Bus will leave on 9:00 am.
- Arriving to Bayt Al Memar on 10:00 am.

They will visit:
- Bayt Al Memar. (It includes different Rooms arranged in chronological order)
- The bus will leave Bayt Al Memar on 1:00 pm.
- Return to the University on 3:00 pm.
1 – The students will take photos of the house, the architecture elements and also the different designs of the contemporary architects who lived there.

2 – They will submit a field trip report and a Power Point presentation which shows the different works of the contemporary architects (Hassan Fathy and Ramese Wesa Wassef).

Students Feedback:

Related Unit or Units

ARCH201 Technical Drawing II – Introduction to CAD
INTR351 “Concept and representation I”

Relation to the Unit/Units:
It is very useful for the students as they can use it to present their work in different design units.

It is considered as advanced level for the unit ARCH201 (Technical Drawing II – Introduction to CAD).

Workshop Aims:
Teach the students how to build a simple 3D model.

Workshop reflection to The learning outcome:
Students learned how to transfer a 2D Plan to a 3D model.

Workshop Activities:
Each student in the workshop build his own 3D model.

- Found it very useful and Handy
- Looking forward for More

**Relation to the course:**
Knowing the history of fabrics and costumes.
The ancient process of sewing a garment.
The accessories used in old Egypt.
Increasing the practical experience for the students
The students will get the knowledge about the basic materials used for making garment
The environment reflection on the character of the ancient Egyptians

Students will achieve practical experience rather than intellectual practicing

- We started our tour by seeing sculptured status for kings and queens made from granite.
- The students were interested in the used garments and the way the ancient Egyptians wore it.
- The draw sketches for the costumes and take photos.
- Then we visited the royal mummy’s room.
- The students saw garments for the kings and queens and also for workers.
- The students saw the army clothes and their tools.
- The students saw the materials and the dyed fabrics and weaving tools.
- Then we visited the tut ankh amon room.
- Then we visited the jewelry room.
- And finally we passed through the warehouse that includes the final packages that are ready for dispatching.
Increasing the practical experience for the students. The students will get the knowledge about the basic materials used for making garments and the environment reflection on the character of the ancient Egyptians.

Relation to the Unit/Units: Theoretical and analytical approach to Game Art

Theoretical and analytical approach to Game Art

To give the students an opportunity to discuss the concepts of game art practices and to understand and use game as an art form with a well experienced creative artist working in the field.

Understanding different aspects of visual perception & the evolution of gaming and game art

- Brief about the evolution of game art.
- Selected works by Game artists: Cory Arcangel, Joseph Delappe, Feng Meng Bu, and Jason Rohrer.

- Found it very useful and encouraging.
- Engaged in multiple fruitful discussions with the lecturer to understand more about using Game as an art form.
- Looking forward for a practical workshop with the lecturer useful and encouraging.
- Looking forward for More Sessions
Since its launch in 2011, the Faculty of Arts & Design, MSA University has acknowledged the necessity and importance of extracurricular activities understanding the deep impact and broad reflection it has upon students during their course of study in the Faculty as well as in their future careers after graduation.

The Faculty of Arts and Design established an activities program directly related to each department in the Faculty consisting of 3 major parts; workshops, field trips and guest speakers. This program is crucial for the development of the student both on the intellectual and practical level allowing further understanding and practice in the field of specification.
